

Therm It GS 10 Round section fibre glass seal

Therm It GS 10 glass fibre rope seal is manufactured from continuous filament 'E' type glass yarns which have been mechanically bulked to increase the loft. 'E' type glass fibre offers the best thermal resistance of the types available and the bulking process creates an end product which is light in weight yet still very efficient as an insulator.

What's it used for?

1. Industrial boilers.
2. Domestic boilers.
3. Fire barrier.
4. High temperature insulation
5. Metal smelting industry.

Technical information.

Maximum short term temp 600°C
Colour White/Black
Incombustible
Resistant to oils, most chemicals and solvents
Unaffected by bacterial growth

Standard format.

Standard diameters: 3, 4, 5, 6, 7, 8, 9, 10, 12, 13, 15, 16, 20, 25, 30, 35, 45 mm
Reels, Coils, (typically, 25, 50, or 100M depending upon diameter)
